1) Take risks

Now is the time to take risks.

While you're young, you don't have
a:

- family
- business
- mortgage

That depend on your success.

It only gets riskier as you get older.

So take risks now. Do something
bold.

2) Combine talent with interest

Desire for fame won't lead to long term success.

Instead, find a job that:

- Matches your skillset
- You're talented at
- You enjoy

Passion beats pride every day of the week.

3) Focus on the job in front of you

Lofty goals are important,

But they're built on measurable
achievements.

Learn 1 role.

Master 1 role.

It may not be your end game,
but your ability to over-perform will
stand out on your resume.

4) Don't seek leadership, earn it

Don't try to be a leader for the sake of being a leader.

Instead:

- Learn everything you can
- Take responsibility
- Master your role

Leadership will come to those who deserve it.

(Most often... to those who don't want it)

5) Gather great people

In business, you cannot succeed alone.

You need experts at your side.

To find them:

- Reach out on socials
- Attend networking events
- Build a business that attracts them

Your network will easily 10x your net worth.

6) Seek to contribute

Society needs you to be useful.

- Solve a problem
- Build a business
- Contribute more than you consume

Aim to have a positive net contribution to society.

Being useful = true fulfillment

7) Ingest information

Ingest as much information as possible from:

- Books
- Textbooks
- Journals / Articles

Along with increasing intelligence, you'll:

- Improve memory and focus
- Expand your vocabulary
- Reduce stress

Expanded knowledge = expanded opportunity
