

Taimoor - تیمور.eth 🇵🇰

@mtaimoorhas

My @Google Extend I/O Slides, (Google Event).

"Building Low-Code AI Applications FAST!"

Why FAST? almost 1500+ AI products on avg are launching every month. Hence, leave your excuses aside & try to build products FASTER with new solutions, that can sustain in long run & have proper use cases for people (that most of the makers miss while in gold rush).

1) Introduction,

Short Summarized Version of me for those who don't know me.

cc. Spcial thanks to @agazdecki for being big part of this journey.

Google Extended

Who's Taimoor?

- Started Freelancing at age 12.
- Build Pakistan's 3rd largest AdTech Network at age 14.
- Made a lot of side-projects (Solo).
- Started "QueryCity" an EdTech Startup (O'levels).
- Won Microsoft Imagine Cup 2021 Nationals/World finalist.
- Sold 7 Side-Projects in 7 months.
- Made around \$45K revenue.
- Started OctaLabs, a Startup/Product Studio.

2) NoCode Backend,

If you want to build apps FASTER, you must check the apps mentioned below for end to end solution.

Solutions ranging from pre-built/pre-hosted/pre-trained models to custom training & model hosting, without writing code.

cc. @google @OpenAI @leap_api @obviouslyai
@replicatehq @BananaDev_ @EdenAIco
@runwayml @StabilityAI

3) NoCode Builders,

Don't have coding knowledge, or want to build apps FASTER, must try the nocode solutions that are established or are emerging in the market.

Solutions ranging from building in-depth custom products to pre-built web templates. From making webapps to mobile apps.

A lot of people are using no-code tools to build big prods, e.g [@rushabtated4](#), more & myself 😊

4) Chatbots & AI Agents,

Want to automate things based upon data? Want to converse with data? Want to use AI more precisely?

Here are some solutions that brings solution of automating things for you.

cc. @spellhq @SiteGPT @chatbase
@VoiceflowHQ

there were a lot more that i forgot e.g [pdf.ai](#)

5) Connectors,

Once you have backend ready & frontend ready, there should be a way to connect both the things for the flow of the data, right?

here are 2 ways that can make you product "working".

*@X does not allow more than 4 images.

a) No-Code Automation,

AI Models ---> [@zapier](#)/[@make_hq](#) ---> Application.

b) No-Code Automation,

AI Models ---> APIs (e.g [@leap_api](#)) ---> Application.

thanks to [@bentossell](#) & [@TheRundownAI](#) for keeping us updated in the gold rush of AI.

Thankyou for reading, more detailed things will be published soon, SO FOLLOW ME FOR MORE!
